

CARBONAA

BE BOLD, CHANGE THE FUTURE

APRIL 2024

BE BOLD,
CHANGE
THE FUTURE

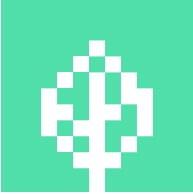

Who we are?

We are an agile, progressive start-up prompting transparent carbon credits with high socioecological impacts to actualize sustainable development on our planet with innovative solutions.

We act as a CSR service partner for companies to show their social responsibility to the environment and people in the best possible ways.

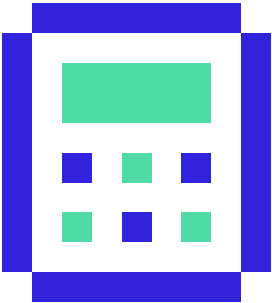

We help companies to translate the carbon calculation and compensation for their target market and increase their sales via informing the society about ESG impacts (Environment, Social and Governance activities).

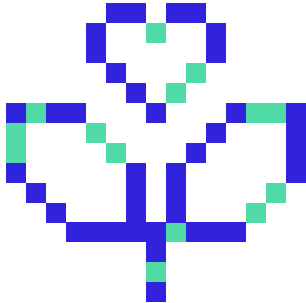

What we do?

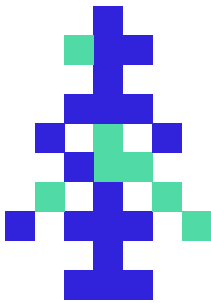

We provide these straightforward and efficient steps

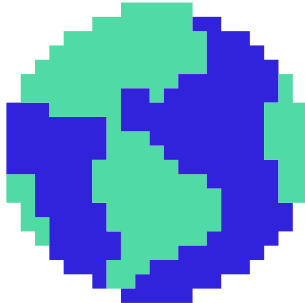

CALCULATING CARBONS

CHOOSE PROJECT

OFFSET CARBONS

NET - ZERO JOURNEY

Vision

Carbonaa visualizes a planet where life is a priority of high value to balance the matter and energy in the ecosystem. Carbonaa merges this value and sustainability to actualize scaling of Carbon capturing.

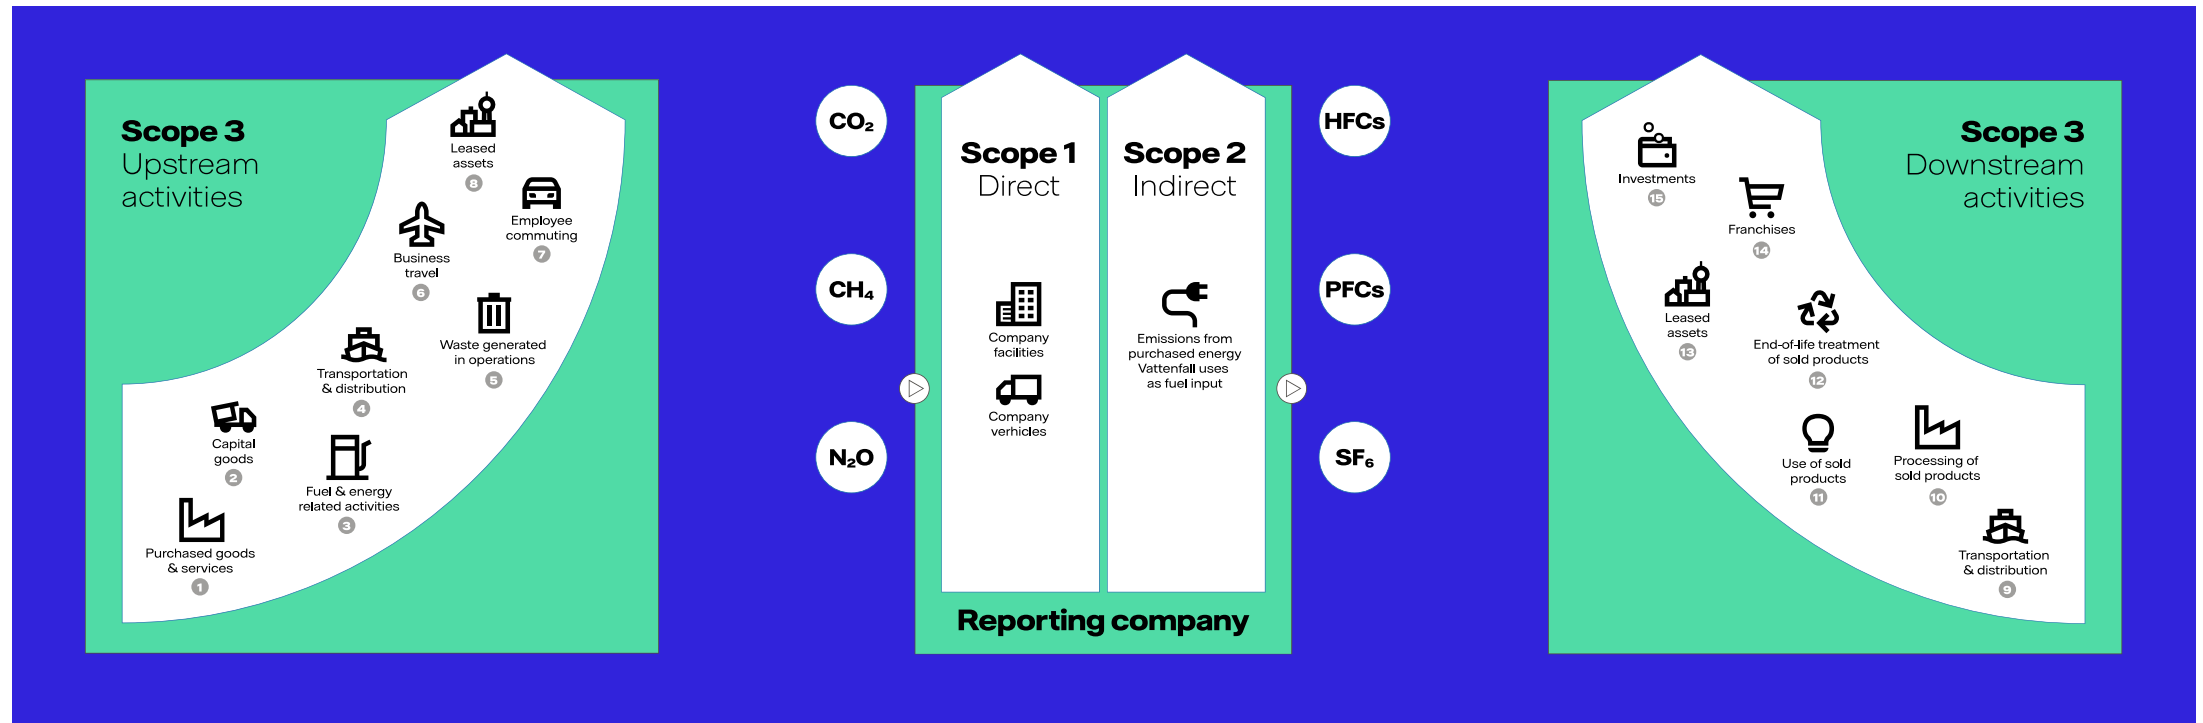

Mision

Carbonaa cares deeply about our planet and utilizes high impact, effective, and sustainable methods to plan, manage, and support certified, traceable projects in scale.

Carbon Footprint

Calculation of carbon footprint for last year DATA 2023 according to emission data based on ISO14064 and GHG protocol in scope 1 and 2 and 3 based on customer request.

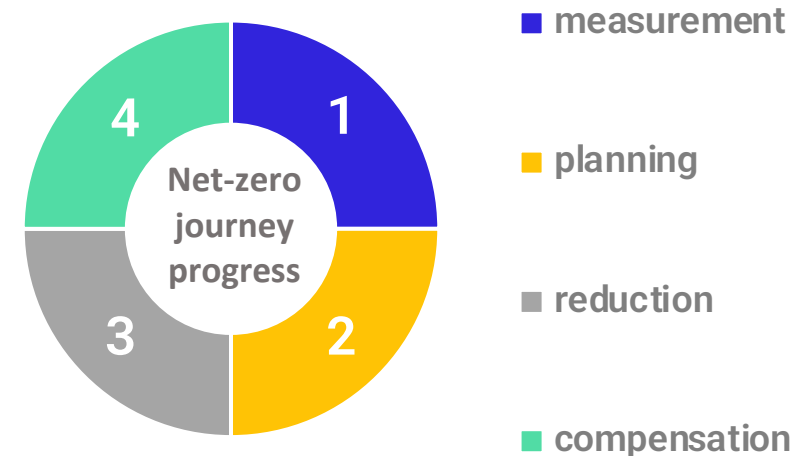

Net Zero Journey

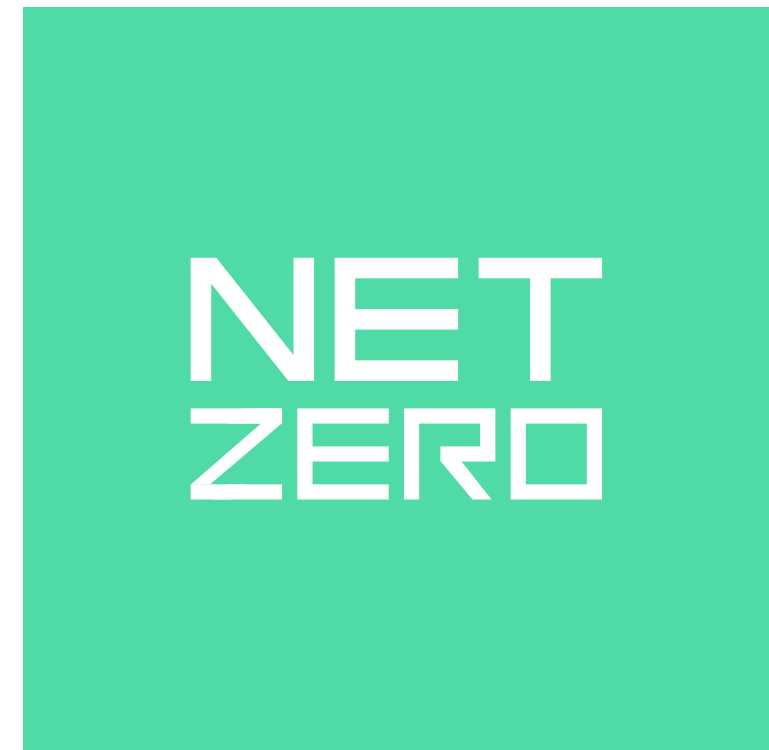

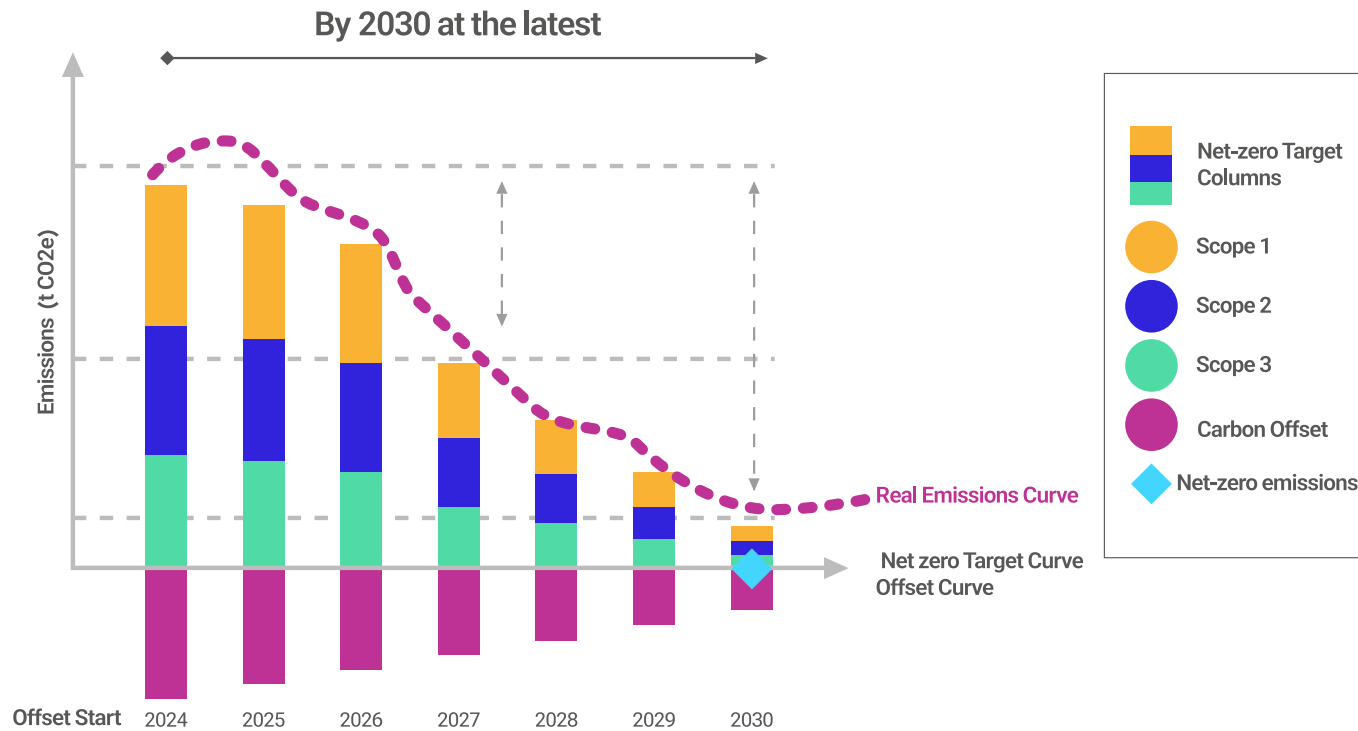

- Net Zero Journey is the process of carbon foot print reduction with specific annual targets based on Paris agreement. Companies that participate, will be part of an international movement through which we can prevent more than a 1.5C' increase of the global temperature. The global target date to achieve the goals of Net Zero Journey is the year 2050. Every entity that gets involved in this process will have their own individual annual goal and methods of monitoring. The annual assessment is designed to keep them on track to reach their predefined offset goals.
- Companies have a choice of Three (3) different plans based on the start point.

- Sales type: B2B
- Annual subscription and license

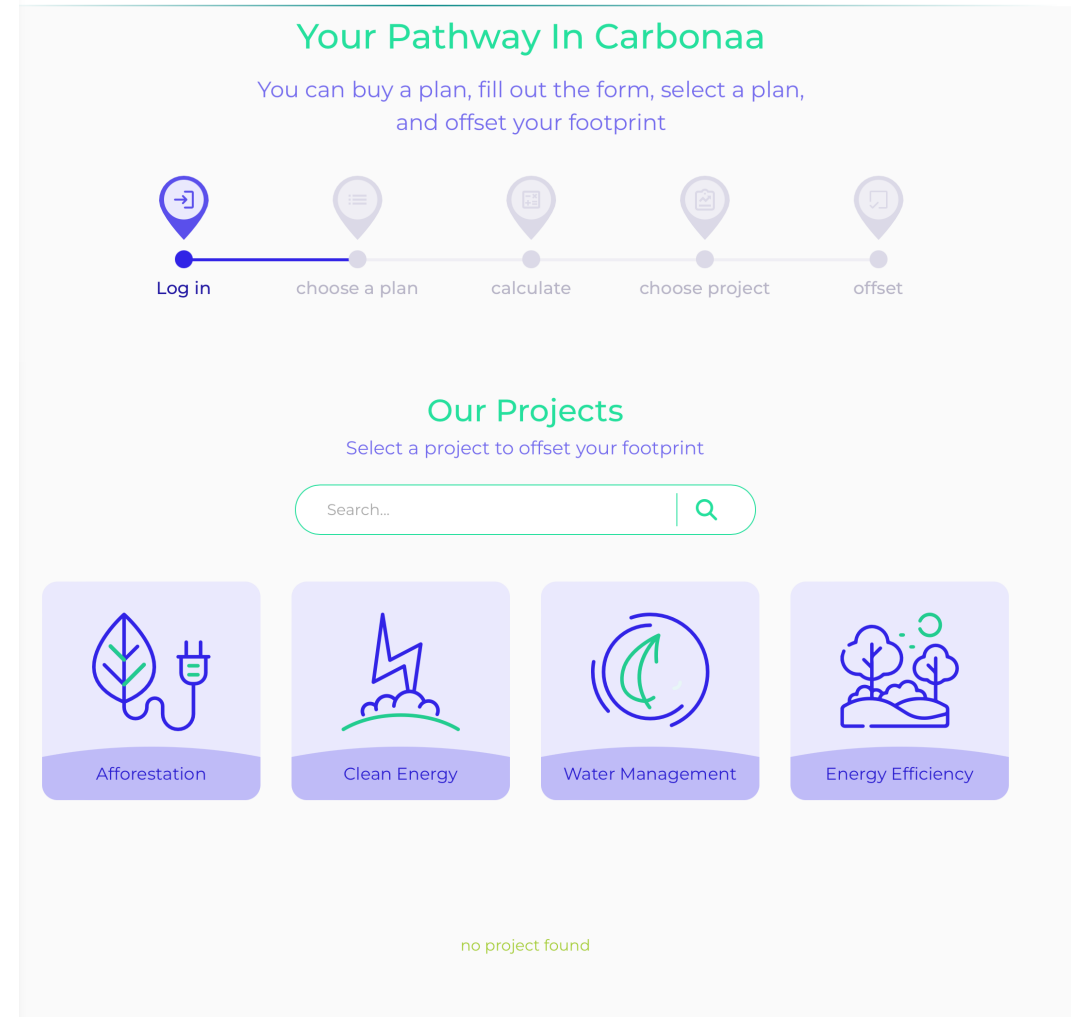

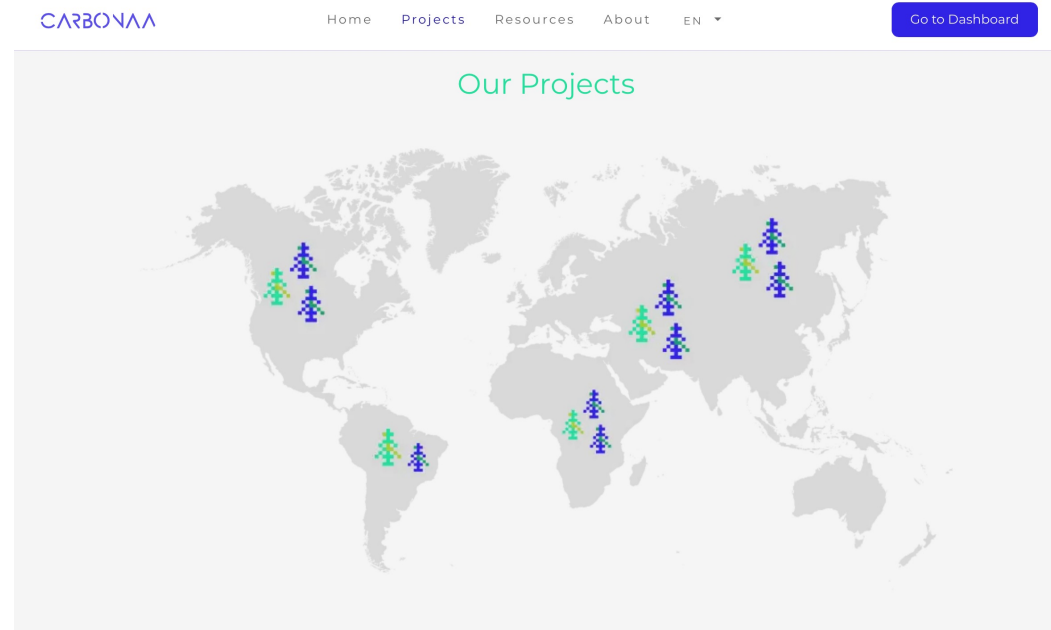

CARBONAA offers NET-ZERO journey for partners in this package via calculating and compensating a part of emissions in long Term activities with equivalent purchased carbon in first year.
